### 2<sup>nd</sup> INTERNATIONAL CONFERENCE

Gather around several researcher communities from various fields ranging from physics to biology through chemistry, medical sciences and material sciences. Create structural links between the different scientific communities to initiate multi-technical collaborations to advance each topic in a new multidisciplinary approach. Initiate international projects between European laboratories and those implanted in the basin of the Americas, including United States, Canada and the emerging countries (Brazil, Mexico, Argentina), whose excellence in research and research and development are increasing since the last decade

### TOPICS 2018

- Nanosciences at the frontiers with biology
- Nanomedicine, Nanotoxicology and Nanobiotechnology
- Nano-biomaterials & Latest Applications for Health
- Nano-Instrumentation and Application for Life and Materials Sciences
